

My first year experience of being Vice President for the high school football organization, was certainly a busy one.

The main issue we had to deal with this year was setting a new contract with the high school. With the help of Craig and Mark this was accomplished and a new 3 year contract was set.

Other issues that I noticed that haven't been covered in the past and needed attention were:

- Out of Town Official Exchanges
- A Clinic on Vancouver Island (Interior could not establish a date so therefore no clinic was set)
- 30 plus games of observation
- Filming on 15 Plus games (currently reviewing films and building a film library for future education)
- Joining Arkansas Association to help clarify ruling and mechanics
- Established an Education Committee (Open Application to anyone who would like to apply)

All of the above noted items have been implemented and are currently being reviewed.

Things needing to be addressed still:

- Attendance for clinics (Executive is looking at a charging a fee and then rebating when you have attended the clinic)
- More officials (recruitment)
- Out of town travel expenses (being reviewed to see how to be more efficient)

As for the New Year we be establishing dates for the clinics (the executive and I can decide whether or not we will send and observation staff to determine if mini clinics need to be arranged after the game).

I would like to thank the allocator and the education staff and will continue to have these positions open for anyone to apply.
